CLP Co-Organises China Nuclear Energy Conference
Fully Supports the Development of Nuclear Energy of the Nation

CLP Holdings Limited (CLP) fully supports the nation’s development of nuclear energy. We attended the 3rd China Nuclear Energy High-Quality Development Conference and Shenzhen International Nuclear Energy Industry Innovation Expo (CINIE) this year as a specially invited co-organiser. CLP Holdings Chief Executive Officer Mr T. K. Chiang officiated at the opening ceremony with China General Nuclear Power Corporation (CGN) Deputy Secretary of the Party Committee and General Manager Mr Gao Ligang, and other guests including officials from the China Atomic Energy Authority, National Energy Administration, Ministry of Ecology and Environment and the People’s Government of Shenzhen Municipality. CLP Power Managing Director Mr Joseph Law delivered a keynote speech highlighting the contributions of nuclear energy and the Daya Bay Nuclear Power Station to Hong Kong’s economic and social development, and the important role nuclear energy plays in the decarbonisation of the Greater Bay Area and Hong Kong, and signed the “Development of New Quality Productive Forces in Nuclear Industry Manifesto” with leading nuclear enterprises, academics and experts, collectively committing to the high-quality development in nuclear energy.

CINIE is the signature event of China’s nuclear energy industry and was organised by the China Energy Research Society and CGN. Held at the Shenzhen Convention and Exhibition Center from 11 to 13 November, it was attended by officials from related government departments, as well as key leaders and practitioners from nuclear-related enterprises and research institutes. As an investor and off-taker in nuclear energy, CLP was invited to be one of the specially invited co-organisers and played a part in contributing to the development of nuclear industry.

The theme of this year’s event was “High-Quality and Innovative Development Shapes New Quality Productive Forces in Nuclear Energy”, which was in line with the national strategy to promote the safe and efficient development of nuclear energy. It featured a number of expert forums for industry professionals and academics to exchange ideas

on key topics including the supply chain of nuclear industry and latest nuclear technology.

In his keynote speech, Mr Law said, “CLP entered Mainland China’s energy market in the 1970s by supplying electricity to Guangdong province. In the 1980s, we invested in China’s first large-scale commercial nuclear power plant, the Daya Bay Nuclear Power Station, bringing non-carbon nuclear energy to Hong Kong in partnership with CGN. CLP subsequently became a shareholder in the Yangjiang Nuclear Power Station, establishing a stable, long-term partnership with Mainland China. We are proud to witness, participate in and benefit from the reform of the nation’s power sector.”

He added, “The Daya Bay Nuclear Power Station was commissioned in 1994 and has supported Hong Kong’s development and prosperity over the past 30 years while making a significant contribution to the city’s environmental protection. CLP will continue to support the development of nuclear energy in China through investing in and off-taking nuclear energy, advocating nuclear energy through public education, and facilitating international collaboration as a connector, in order to achieve the decarbonisation goals of the Central Government and HKSAR Government.”

About CLP Group

The CLP Group is one of the largest investor-owned power businesses in Asia Pacific with investments across Hong Kong, Mainland China, Australia, India, Taiwan Region and Thailand. Hong Kong-listed CLP Holdings Limited is the holding company for the CLP Group, which has a diversified portfolio of generating assets that uses a wide range of fuels including coal, gas, nuclear and renewable sources.

Through CLP Power Hong Kong Limited, the Group operates a vertically integrated electricity supply business that provides a highly reliable supply of electricity to 80% of Hong Kong’s population. The CLP Group is one of the largest external investor in the energy sector in Mainland China. The Group’s wholly-owned subsidiary EnergyAustralia is a leading integrated energy company in Australia, providing gas and electricity to about 2.42 million households and businesses. Apraava Energy, in which CLP has a 50% interest, is one of India’s biggest renewable energy producers with operations in power generation and transmission.

CLP Holdings is included in the Global Dow – an index of the world’s leading blue-chip companies, in addition to sustainability-focused indices including the Dow Jones Sustainability Asia Pacific Index (DJSI Asia Pacific), the Hang Seng Corporate Sustainability Index Series and the FTSE4Good Index series.
